

# Our Vision: To be the global record of physical goods

*“The key to prosperity is making a positive contribution to society”*

Larry Fink, Blackrock CEO, in letter to CEO's of public companies, Jan 12<sup>th</sup> 2018

# Security Matters in a nutshell

Security Matters owns and has commenced commercialising the technology to permanently and irrevocably “mark” any object either solid, liquid or gas, allowing identification, proof of authenticity, tracking supply chain movements & quality assurance for countless products in virtually every industry.

Security Matters’ technology comprises a chemical-based hidden "barcode" system, alongside a unique “reader” to identify these codes, and a blockchain record to store and protect ownership data.
